- Place on a flat, smooth, stable surface.
- Unplug the Tower Heater from power outlet. Allow Tower Heater to completely cool, then plug back into the electrical outlet for use.

## TROUBLESHOOTING

- Be sure the power supply cord is plugged into a working electrical outlet.
- The Tower Heater may be off due to overheating. Unplug the cord and allow it to cool 15-20 minutes before plugging it back in & turning it on.
